EXTRA REMINDER

As always, your **high-res PDF** is your ultimate guide to what will print in your yearbook. Please be sure to print and closely examine your PDF to make sure you like what you see.
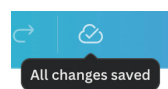

INSTRUCTIONS

In your library, select an image for this effect.

Right click and choose **Edit Image** to open that image in Canva.

Select **Edit Image** in Canva and then search for the word **Duotone**.

Click **See All** to see an extensive list of color options for your image. Select one as a starting point.

To adjust the colors, click the toggles that appear on the duotone you selected. This will allow you to apply new colors, add your own and adjust the intensity.

When you're done, click **Apply** and wait for that change to lock to your image. You can also look for a checkmark in the cloud icon to determine if your image edits have been saved. Look for this before publishing back to eDesign

Click the **Publish** button in the upper right. Your duotone image will be published from Canva into your eDesign Candids library.

Tip: Write down your duotone settings, including if you've adjusted highlights, shadows, and/or intensity. This way you can apply the same color blends and settings to additional images you may create using the same duotone effect.
